

STATIONARY EXERCISE BICYCLE
MARKED-UP VERSION OF ALL AMENDED CLAIMS

17. (Amended) A stationary exercise bicycle that is adjustable to allow a rider to adopt different riding positions, comprising:

a frame having front and rear sockets;

an adjustable seat mounted in the rear socket, the adjustable seat being extendable in fore and aft directions relative to the rear socket; and

an adjustable handlebar mounted in the front socket, the handlebar including [an upright portion.] a lateral bar directed outwardly from [the upright portion] the front socket, a first handle having at least one prong extending forwardly from said lateral bar, and at least one second handle [extending forwardly from said lateral bar] inwardly located relative to the at least one prong.

24. (Amended) The stationary exercise bicycle of claim 17 wherein the seat [is detachable] includes a means for detaching the seat from the rear socket.

25. (Amended) The stationary exercise bicycle of claim 17 wherein the handlebar [is detachable] includes a means for detaching the handlebar from the front socket.

40. (Amended) A stationary exercise bicycle that is adjustable to allow a rider to adopt different riding positions, including alternating sitting and standing positions, while remaining on the bicycle, comprising:

a frame having front and rear sockets;

a seat adjustably mounted in the rear socket, the adjustable seat being extendable in fore and aft directions relative to the rear socket, and being

adjustable to a seat position that allows the rider to adopt different riding positions, including alternating sitting and standing positions, while remaining on the bicycle; and
a handlebar adjustably mounted in the front socket[, the handlebar including an upright portion,] including a lateral bar directed outwardly from the [upright portion] front socket, a first handle having prongs extending forwardly from said lateral bar, and a second handle [extending forwardly from said lateral bar] inwardly located relative to the prongs, the handlebar being adjustable to a handlebar position that allows the rider to adopt different riding positions, including alternating sitting and standing positions, while remaining on the bicycle.
